WORK EXPERIENCE

Associate Product Manager

farmersMandi

05/2021 - 01/2023

(2 years) Bangalore

FarmersMandi is a Agritech startup (Founded by Redbus Co-Founder) with an aim to digitise supply-chain for F&V users.

- **Owning the Product for Distributor app:** Rolled out features to organise & optimise the whole Ops flow for distributor operations which brought clarity & efficiency to them, increasing customer satisfaction & helping lower the manpower requirement by **~60%**.
- Added **payment related features** to show transaction ledger, Wallet pages, amount transfer from Wallet to Bank, etc. for various customer types (sellers & distributors).
- **Owning the Product for Seller app:** Rolled out few important features like multi-market inventory open, dynamic price control & availability of inventory, **localisation** of the app (regional languages).
- Proficient in **agile** methodologies, including **sprint planning**, daily standups, **scrums** & **estimation**. Skilled in creating and executing **product roadmaps**, managing **epics, stories, backlog** and optimizing **delivery velocity**.
- Worked directly with Founder, Head of Product, Engineering team & CTO, Design team to roll out the above mentioned features and co-ordinated with Sales & Support teams to assist users.
- Co-ordinating with the designer for **Figma** based screens & also designing multiple screens myself in Figma as and when required.
- **Customer support initiatives:** Rolled out a mini ticketing system for retailer support & integrated Exotel with round robin assignment to automate a process that was handled through excel sheets & multiple handshakes, leading to **100% tickets** being captured & resolved, with reduction of the resolution time on an average from **~4 hours to 5 minutes**.
- Automated delivery ops payments which were being handled through excel sheets and incorporated tax deduction mechanism in the whole supply chain which led to reduced payment reconciliation time from **1 week to 1 day (~5x reduction)** & also reduced the reconciliation manpower by **50%**.
- Also, this helped us bring transparency to per kg Ops cost spend which was high and then efforts were made to reduce this cost by **75% (from INR 4 per kg to INR 1 per kg)**.

SKILLS

Product requirement writing (PRDs)

Product Roadmap & Feature priority

Agile project management

JIRA, Trello & Confluence

UX/UI Design - Figma & Adobe XD

User Research & Surveys

A/B testing & Incremental rollout

Metabase - BI Reporting

OneSignal - Notifications

MixPanel - Customer engagement

Exotel/Freshchat- Customer Support

WhatsApp Business - Notifications

EDUCATION

DATA DRIVEN PRODUCT MANAGEMENT (Executive Program)

IIM Lucknow

02/2021 - 11/2021
Bangalore

BACHELOR'S DEGREE IN COMPUTER SCIENCE

Visvesvaraya Technological University

04/2005 - 05/2009
Bangalore

WORK EXPERIENCE

Associate Product Manager

farmersMandi (Continued..)

05/2021 - 01/2023

(2 years) Bangalore

- **WhatsApp** Notification integration through **Gupshup** - Negotiated the deal with Gupshup to wave-off the upfront payment of **INR 1 Lac** & reduced the monthly charge by **28%**. This led to increase in click-through-rate from **~2% to ~70%**.
- **OneSignal** for In App & Push Notifications - Used to run marketing campaigns along with the marketing team to drive awareness about deals, price drops, SKU availability, etc.
- Used **MixPanel** events to check user engagement & analytics for loyalty program funnel, seller price editing activity, payment bypasses for retailers, order limit increases, etc which led to some critical insights & follow-up actions.
- Reporting via **Metabase** - Generated many reports via Metabase like booked & delivered quantity per market, cancellation percentages, distinct items & shops, new onboarding, etc. which were used by Sales & Support teams, Founders & Core team, etc. for decision making, tracking progress & course-corrections.
- Assessing **loyalty program** effectiveness - A loyalty program was rolled out with the aim to achieve 100% retention & increase AOV per shop but it wasn't delivering results. Worked with Head of Product & surveyed retailers, used **MixPanel** events to analyse the usage & time spent, program effectiveness, pitfalls, etc.

Principal Software Engineer (Frontend)

Biofourmis

04/2020 - 02/2021

(10 months) Bangalore

Biofourmis is a MedTech company transforming patient health through personalized and predictive care.

- **Web application for Home Hospital program:** Involved in weekly discussions with the external client for understanding requirements & planning the product roadmap with feature prioritization.
- Design reviews at regular intervals to validate the UX and technical feasibility. Involved in decisions like platform support (web, native mobile apps, hybrid apps) to best meet the customer's usability.
- Lead a team of two as a frontend developer (angular) and successfully released the v1 of the project. Took the lead to manage discussions between frontend, backend, QA and product team.

R&D Engineer III / Tech Lead

Honeywell

08/2015 - 03/2020

(4.5 years) Bangalore

Fortune 500 Aerospace, Smart Buildings, Safety & Chemical Manufacturing

- **UAV powerline inspection for Ozarks Electric, Arkansas & Web App for Honeywell's Blockchain platform.** Web app to facilitate planning, job assignment, scheduling & tracking for UAV pilots. Added Redux state management, interactive maps through Mapbox augmented with UAV data, used AirMap & DarkSky for airspace intelligence like weather, elevation, etc.
- **Datalink for Boeing 787/777x & KTR2280A for Pilatus Aircraft, Switzerland (2015 - 2019)** Implemented the Crew Interface System (CIS) redesign to enable AoIP (Acars over Internet protocol) functionality through TFTP (File Transfer) protocol.
